| Production per cycle | 70 kg from +90° C to +3°C in 90 minutes; 35 kg from +90° C to -18°C in 240 minutes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Technical features   | <ul style="list-style-type: none"><li>• One-piece construction, external and internal structure in AISI 304 stainless steel. Satin Scotchbrite finish on door, side and control panels.</li><li>• CFC-free expanded polyurethane insulation, 75 mm thickness, density 40kg/m³.</li><li>• Refrigeration cell with rounded corners and condensation drain in the bottom.</li><li>• <b>Refrig. cell able to take GN 2/1 containers (nr 10 or nr 20 GN 1/1 containers)</b></li><li>• Removable wire rack in AISI 304 stainless steel wire, 10 positions, 80 mm. vertical spacing intervals.</li><li>• Self-closing door with full height outer stainless steel handle. Easily-removable magnetic gasket. Door frame with heating element.</li><li>• Door hinge left.</li><li>• Protection: IP24</li><li>• Copper/aluminium rustproofed evaporator.</li><li>• Refrigerant fluid: R452A.</li><li>• Hinged fan cover panel for easy access to the evaporator and fan during cleaning.</li><li>• Internal operation: ventilated cell, ventilation not directly on foods.</li><li>• Evaporation temperature control with thermostat valve.</li><li>• Air defrosting</li><li>• Cooling unit at evaporation temperature -23,3°C and condensation temperature 54,4°C rated at <b>4369 W</b>.</li><li>• Air cooling.</li><li>• Max room temperature +32°C (Climate Class 4, room temperature + 30°C and 55% R.H.)</li><li>• All controls and parts accessible</li><li>• Stainless steel feet height-adjustable from 105 to 155 mm.</li></ul> |
| Functional features  | <ul style="list-style-type: none"><li>• <b>LCD control board + encoder</b>, multi-lingual, multi-sector with the possibility of selecting between the time-based abatement mode or the core probe mode, which acts upon various parameters.</li><li>• <b>PROGRAMS:</b><ul style="list-style-type: none"><li>- <b>I.F.R.:</b> is the patented positive blast chilling system that automatically optimises the process for any type of food, no matter the size and quantity, chilling its surface thanks to the use of a multipoint, three sensor needle probe.</li><li>- <b>SOFT +3°C:</b> cycle carried out through probe at the core or time, suitable for chilling foods up to +3°C, using a chamber temperature of about 1°C.</li><li>- <b>HARD +3°C:</b> cycle carried out through probe at the core or time, suitable for chilling foods up to +3°C, using a chamber temperature varying from -15°C to -1°C.</li><li>- <b>SOFT -18°C:</b> cycle carried out through probe at the core or time, suitable for freezing foods up to -18°C, using a chamber temperature varying from 1°C to -40°C.</li><li>- <b>HARD -18°C:</b> cycle carried out through probe at the core or time, suitable for freezing foods up to -18°C, using a chamber temperature that can reach -40°C.</li><li>- <b>INFINITY:</b> time chilling/freezing cycle with infinite duration, suitable for cooling various type</li></ul></li></ul>                                                                                                         |
